HEAD 1: THE GRAMMAR DETECTIVE

THE ANIMAL DIDN'T CROSS...

SUBJECT

VERB

INVESTIGATION LOG:

- Ignoring emotional content.
- Focusing on rigid rules.
- **FINDING:**
Noun 'Animal' performs Action 'Cross'.
- **DIAGNOSIS:** Syntactically sound. It is not Lupus.

EMOTIONAL RESPONSE

HEAD 2: THE VIBE DETECTIVE

ANIMAL

STREET

⚠️ ALERT

ERROR: PHYSICAL MISMATCH.
STREETS CANNOT FEEL FATIGUE.

... BECAUSE IT WAS TOO **TIRED**.

INVESTIGATION LOG:

- Analyzing physical states.
- FINDING: 'Tired' is a biological condition.
- DEDUCTION: 'It' must refer to the Animal, not the Street.
- DIAGNOSIS: Semantically consistent.

"HE SAT..."

BANK

"...THE WATER."

THE CONFLICT: Financial Institution vs. River Edge?
THE SOLVE: The Squad detects "Sat" (Physical Action) + "Water" (Context).
RESULT: Ambiguity resolved. It's a river.

THE TEAM MEETING: CONCATENATION

SUBJECT: ANIMAL. VERB: CROSS. SYNTAX VALID.

STATE: TIRED. BIOLOGY: MATCH.

TONE: EXHAUSTED. SENTIMENT: NEGATIVE-PASSIVE.

CONTEXT
VECTOR

PROCEDURE:

1. Gather independent reports from all Heads.
2. 'Staple' vectors together into one master file.
3. Submit for final judgment.

Current Status: FULL PICTURE ACQUIRED.

THE FINAL DIAGNOSIS

Why Multi-Head Attention Works:
A single head sees 'Great Job' and thinks 'Happy.'
The Squad sees the conflict between the words and the reality.

FINAL OUTPUT: Complex reasoning achieved.
